

HETI PUHDAS UUNI

Cleanser for self-cleaning ovens

Use

A strongly alkaline cleanser for cleaning of fan ovens, grills, bakery ovens and cooker hoods made of stainless steel. Removes very effectively burned and dried food scraps and grease-crusts of the oven and cooking dishes. Not suitable for aluminium.

The dish is connected to the automatic dispenser system of the oven/grill. The product can also be foamed or spread as such. HETI Puhdas Uuni is diluted in ratio 1 to 10 for cold and cooled surfaces. Warm the oven to between 50-70 °C. If you use higher temperatures, the solution may steam and discolor the steel. After duration of effect (max. 5 min.) remove the separated dirt and rinse well with water. HETI Puhdas Uuni must not be mixed with other agents.

Characteristics

Red, fragrance-free liquid

Product numbers, package sizes and EAN

15775254 5 L 6414505007701

Package and environment

The product must not be released into bodies of water or the soil if undiluted. Small amounts can be diluted and disposed of by releasing into the sewer network, if necessary. Large amounts are disposed of by following the instructions of local waste management. The cardboard in the packaging can be recycled. Canister, bottle and label are made of reusable PE plastic. PE plastic can also be utilized in material recycling and energy production.

Do not let the product freeze.

Made in

Finland
