

INCUCELL® / INCUCELL® V

Laboratory Ovens with Natural/Forced Air Circulation

MMM Group

NEW

Suitable for safe processing of microbiologic cultures. The INCUCELL® line is characterised by noiseless operation and slow air flow in usable space. The INCUCELL® V line (version with fan) guarantees faster and more precise temperature distribution with small variations. Special fields of use include mainly biologic and microbiologic laboratories. They can be also used for quality tests in pharmaceutical industry and cosmetics, for tests in veterinary medicine and food processing industry.

Eco line

- Intuitive control
- Microprocessor process control Fuzzy logic
- Multi-lingual communication
- Acoustic and visual alarm
- LED indicator of device functionality
- LCD display – 3 inches (7,6 cm)
- Transflective brilliant FSTN display, using COG technology (it is backlit and it uses external lighting reflection – higher intensity of external light increases the display readability)
- Adjustable display contrast depending on device placement
- Exceptionally wide vision angle
- Large signs on the display visible from afar
- Current values (e.g. temperature, humidity) during the device operation are enlarged for easy legibility
- Resistant foil keyboard with SoftTouch surface (pleasant to touch)
- Mechanic response of keys
- Lit symbols integrated directly in the foil keyboard
- Keyboard lock to block unauthorised access – adjustable by multiple pressing
- Real time programming and cycling (ramps as optional equipment)
- Integrated datalogger for temperature and relative humidity measuring and recording, with LCD display (optional equipment)

Evo line

On sale from 2018

- Intuitive control
- Microprocessor process control Fuzzy logic
- Multi-lingual communication
- Acoustic and visual alarm
- LED indicator of device functionality
- LCD display – 5,7 inches (14,5 cm)
- Graphic displaying of a new program
- Control through colour icons
- Touch display lock – protection from unauthorised access by a password
- Multi-level administration of users (corresponding to FDA 21 Part 11)
- Data coding and no-manipulability (according to FDA 21 Part 11)
- Up to 100 programs and up to 100 segments for each program
- Programming of temperature ramps, real time and cycling
- Annual data recording in graphic and numeric form
- Data export in online and offline mode
- Pre-set service programs for prompt diagnostics of failures
- Easy service diagnostics including remote access
- SD memory card, USB Host and interface RS 232 – included as a standard
- Connection: WiFi, USB Device or Ethernet interface with proper IP address for remote data transfer, control and diagnostics (optional equipment)

Note:

INCUCELL®/INCUCELL® V

All the technical data apply to 22°C of ambient temperature and ± 10% voltage oscillation (unless stated otherwise).

Standard version up to 70°C, optional version up to 100°C.

*) The trays may be covered to approximately 50% of their surface and if possibly in such a way so as the air may evenly flow inside the chamber space.

**) Mains voltage is specified on type label of the device.

***) Without fan/ with fan.

The values may differ depending on specific charge and media parameters.

Changes in the design and make reserved.
